Product Benefits Overview

X39[®] + X49[™]

X49[™] is most powerful when used with X39[®], so let's first do a quick overview of the benefits of each product.

X39[®] Benefits

The main benefit of X39[®] is **stem cell activation** and enhancement, leading cells to behave as younger, healthier cells. This leads to:

- Increased energy and better sleep.
- Supports the immune system.
- Relief of minor aches and pains.
- Improved Cognition.
- Improved skin quality, reducing the appearance of lines and wrinkles.
- Supports natural wound healing process.

X49™ Benefits

The main benefit of X49™ is promoting an increase in performance in **strength and stamina**. More specifically, it supports:

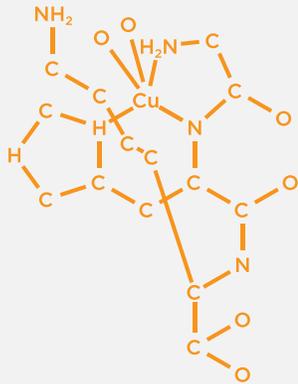

- A healthy cardiovascular system.
- Healthy cognitive function.
- Muscle Recovery.
- Fat loss when used in tandem with a healthy diet and exercise program.
- Bone health.

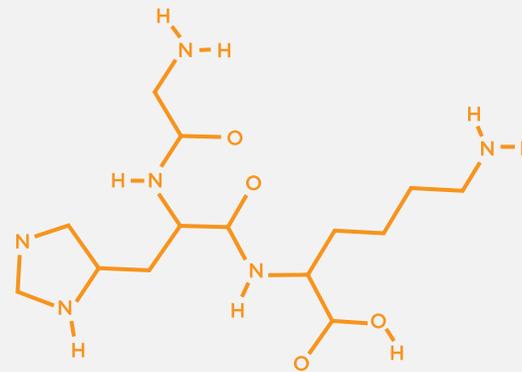

Why is X49™
the perfect companion
to X39®?

How is X49™ *different than* X39®

X39® elevates GHK-Cu

X49™ elevates AHK-Cu

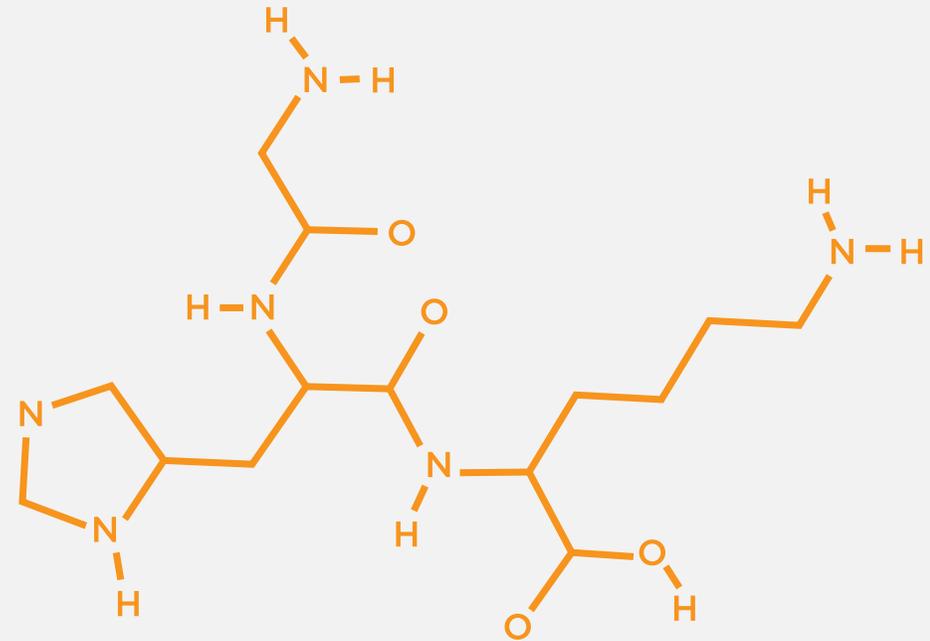

AHK-Cu is the daughter peptide to GHK-Cu and offers a number of unique benefits when it comes to stem cells and health.

X49™ and AHK-Cu

Like X39®, AHK-Cu is a copper peptide and is found in the blood of most mammals.

AHK-Cu has been found to be involved in the health of the vascular endothelial cells (lining of blood vessels).

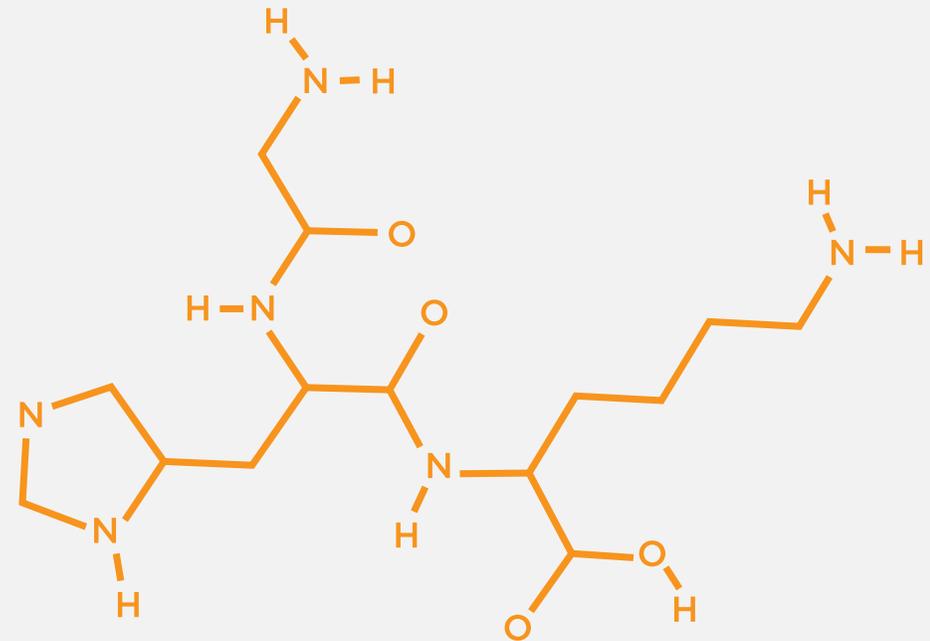

X49™ and AHK-Cu

AHK-Cu has been researched for many years in the skincare industry.

In addition, new research shows AHK-Cu is as effective as minoxidil for regrowing hair, although we do not make that claim.

Our own research into AHK-Cu has found that, because of its ability to metabolize the amino acid Alanine, offers unique benefits that perfectly compliment X39®

Studies Confirm AHK- Cu Production by X49™

Blood samples to measure AHK-Cu concentrations were taken at baseline, 24 hours and at 7 days of wearing the patch. A sample of convenience of 10 subjects made up of both men and women aged 40-81 were selected to participate in one study.

—
One study revealed that there were trends towards increases in AHK-Cu in people that were not vegans or vegetarians. This group typically lacks Alanine.

It will be recommended that for best results with X49™ people consume foods rich in alanine, or supplement where necessary. Meat, poultry, fish, dairy, eggs, soy, beans.

In a separate study statistical significance was reached showing that. AHK-Cu metabolism increased in utilization, supporting bone health.
